

# RTI: From Concept to Reality

## An RTI Implementation Video

Created *BY* Educators — *For* Educators

**Response to Intervention (RTI)**, an important educational strategy for student success, is being implemented in school districts across the country. RTI implementation is a complex process with vast implications for all involved. **RTI: From Concept to Reality** is a DVD containing a series of eight modules that depict many of the critical components of a successful RTI implementation. Through this documentary-style production, Indian Prairie School District 204, a large district with a diverse student body, located in the western suburbs of Chicago shares their story along with some of the strategies, techniques and tools that have made them successful.

The eight modules on the DVD present the essentials of a successful implementation to audiences with varying levels of knowledge. Total running time of the video modules is approximately 60 Minutes. The module topics include:

1. System Level Change
2. Instruction and Intervention
3. Data Systems
4. An “Every Ed” Initiative
5. Grade Level Teams
6. Individual Problem-Solving and Eligibility
7. I Math: An Example of an Intervention for Middle School
8. RTI in a Secondary Setting

Each of the modules is between 7 and 10 minutes in length, making this video a perfect tool for training, group presentations and other settings where the video may be interspersed with discussion, activities or other group interaction.

### *This Video is perfect for:*

- Professional development or In-service trainings
- Learning from the innovative approach of other districts
- Improving your teams understanding of RTI implementation essentials
- Supporting your districts own RTI implementation process
- Orienting new staff to the concepts of RTI
- Educating school board members, parents and the community about RTI

### *Through this video you will:*

- ❖ learn how the successful implementation of RTI requires change throughout a school system; involving fundamental considerations at the board, district, building and classroom levels and how an **Implementation Framework** can provide an important roadmap for all involved.
- ❖ learn how a **three-tiered model** of instructional support and identifying **scientifically-based interventions** are essential.
- ❖ learn how tools such as the **Instructional Planning Form** and **Intervention Integrity Checklist** support the process of connecting instruction and interventions.
- ❖ learn the critical importance of good and regularly collected **data as a fundamental prerequisite** for RTI including universal screening and curriculum based measures. Also learn about the importance and **methods of sharing data** with the entire educational staff AND **parents**.
- ❖ learn how **grade level teams** support the process and how roles and responsibilities change as **every educator gets involved** in data collection and providing interventions across the three tiers.
- ❖ learn how **professional development is critical** as staff gears-up to make the process sustainable.
- ❖ learn how the RTI process relates to and **supports special education eligibility**.
- ❖ learn about the challenges of “scaling up” the implementation to support **RTI in the high school setting**.
